

# Prefabricated Adjustable Wood Shelving

**LUNDIA, MYERS INDUSTRIES, inc.**

*Specialists in Wood Shelving Systems*

P. O. BOX 309 / DECATUR, ILLINOIS 62525

# STORAGE

Available in 90 combinations of depth, width and height, patented LUNDIA storage shelving is designed for use in the storage areas of offices, stores, hospitals, banks, factories, etc. This unusually versatile and economical prefabricated wood shelving, using an interlocking self-tension principle, goes up fast without special tools. All shelves, regardless of size, support distributed loads of 500 lbs. and may be repositioned quickly and easily at 2" intervals by removing and repositioning the shelf support pins. No nuts, bolts, locking devices or tools required.

For economy, LUNDIA storage shelving is most often furnished in natural sanded woods. If a more attractive appearance is desired, LUNDIA storage shelving may be ordered with factory applied finishes which include stains, a dust sealer, lacquer or paint.

LUNDIA storage shelving may be erected as free standing units or in continuous interlocking runs, islands, back-to-back or double decked. Matching accessories available from stock include backs, doors, bin dividers, hang rods, flush and center filled end panels, drawer sections and kickboards.

Planning, layout, design and estimating services are offered without charge or obligation by the manufacturer.

## DIMENSIONS\*

		144"

\*LUNDIA STORAGE SHELVING is available in any combination of the above dimensions.

# GOES UP FAST!

Saves Space!

Saves Time!

Saves Money!

## PREFABRICATED WOOD STORAGE SHELVING

### 1. PREFABRICATED

Save time with uprights that are ready to use.

### 2. ADJUSTABLE

Save up to 20% or more space with shelves that are quickly repositioned without tools.

### 3. ECONOMICAL

Low installation cost. No special tools. All shelves support 500 lbs. regardless of

size and without additional costly supports.

### 4. VERSATILE

Store anything regardless of shape, size or weight. Interchangeable with hang rods.

### 5. EXPANDABLE

Add units to any length. Set up back-to-back or in double decks. Goes around corners, too!

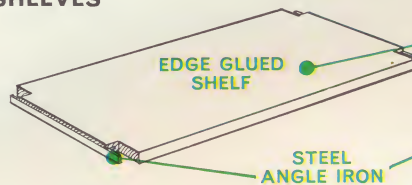

## FEATURES

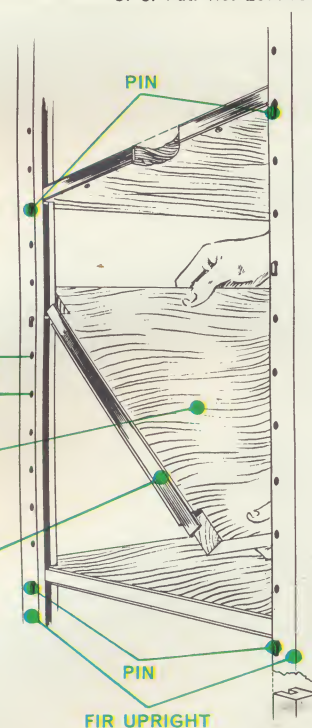

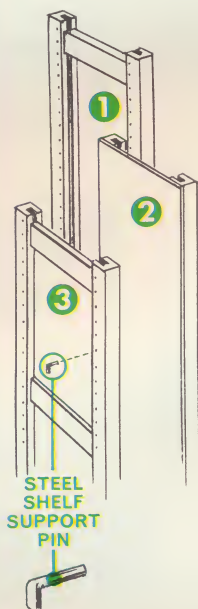

### UPRIGHTS

1. **OPEN** for maximum economy and when separation of units not required.
2. **FLUSH END** to close off run of shelving or for decorative purposes.
3. **CENTER FILLED** to separate units of shelving in runs.

### SHELVES

All shelves are prefabricated from edge glued stock and will support distributed loads of 500 lbs. Steel angles in ends of each shelf rest on steel pins.

### ADJUSTABILITY

Each shelf may be adjusted, without tools, at 2" intervals. Steel shelf support pins are removed and repositioned in holes drilled in stiles of uprights. Adjusting shelves means less wasted space. More capacity per unit.

### VERSATILITY

LUNDIA shelving may be set up in free standing units, runs, islands, or back-to-back for storage in depth. Accessories include hang rods, bin dividers, doors, kickboards and drawer sections. Basic with add-on units serve many purposes at minimum cost.

U. S. Pat. No. 2577138

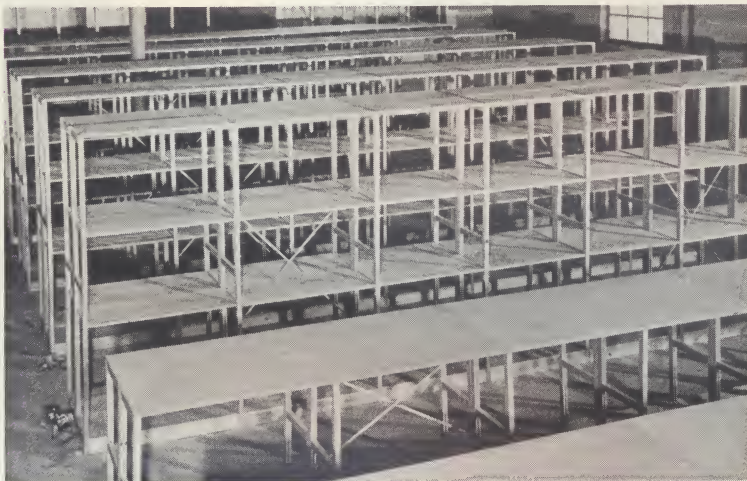

## RETAIL STORE

*Economical and easy to set up, this installation shows how storage shelving can be used on the sales floor. Note doors enclosing lower portion of units.*

## DRUG STORE

*Painted gloss white, this installation indicates the versatility of this shelving. Runs along walls provide maximum display space for self service items.*

## STOCK ROOM

*Set up in less time and for less cost than conventional or built-on-the-job shelving, this installation shows back-to-back units in runs. Shelving may be dismantled and relocated without loss of material.*

## WAREHOUSE

*Broken lots are stored economically and visual inventories can be completed quickly. All shelves, regardless of size, support evenly distributed loads of 500 lbs.*

## DEPARTMENT STORE

*Hang rods and shelves are used at the same time in the same unit. Both are adjustable, without tools, on 2" centers. All shelving and accessories are compatible with existing shelving.*

## DOUBLE DECK

*Uprights of shelving serve as studs to support a wood or metal grating deck. Stairs and railings are included in the installation. Puts overhead space otherwise wasted to work on second level.*

# FULLSPACE

Here is a remarkably simple and practical arrangement of standard LUNDIA prefabricated and adjustable wood storage shelving, erected on rail-riding carriages, that saves up to 40 per cent of the floor space required for an equal amount of conventional shelving.

Store anything! Books, files, records, X-rays, equipment, supplies, garments, etc. Perfect for all businesses. Offices, banks, hospitals, laboratories, chain stores, schools, libraries, department stores, factories, etc.

Movable units of LUNDIA FULLSPACE are easily rolled by hand, left or right, to open one gangway between bays of shelving. Space-taking permanent gangways are eliminated. Aisles between installations of shelving are shortened. Floor space gained can be used for offices, work areas or additional storage facilities.

All shelves are adjustable on 2" centers, without tools. Steel roller bearings ride on steel rails to assure trouble-free performance and long life. Economical to buy. Installed quickly.

Write for descriptive literature and detailed specifications. Free planning, layout and estimating services are available from the manufacturer on request.

**CONVENTIONAL** arrangement of open shelving in bays. Six gangways between bays waste costly floor space.

**FULLSPACE** has only one gangway. Floor space saved may be used for additional storage, offices or work areas.

# GAIN 40% OR MORE FLOOR SPACE

## 1. SAVES SPACE

Eliminates four, five or more space-taking "gangways" between bays of shelving.

## 2. COSTS LESS

No other comparable system of movable storage shelving costs less to buy, install and use.

## 3. EASY TO OPERATE

Fully loaded movable units roll left or right, by hand. No motors, gears or chains.

This LUNDIA FULLSPACE installation saved the owners almost 60% in floor space previously used for storage. Space saved means money saved. Stores anything. Perfect for storage areas in existing or new offices.

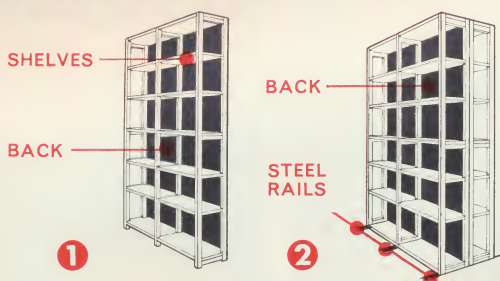

We suggest your LUNDIA FULLSPACE requirements be reviewed by our storage system specialists. They will analyze your requirements and, considering load factors as well as dimensions, make recommendations that will serve you best.

### AVAILABLE SIZES\*\*

	Number of Sections	Width each Section	Shelf Depth Back to Back	Single	Carriage Depth	Carriage Length

	1	36"	15" x 15"		30 1/2"	38 1/2"
	1	48"	18" x 18"		36 1/2"	50 1/2"
	1	42"	18" x 18"		36 1/2"	44 1/2"
	1	36"	18" x 18"		36 1/2"	38 1/2"

\*\*MAXIMUM HEIGHT, INCLUDING STEEL RAILS, IS 88" FROM FLOOR. STATIONARY END UNITS MAY BE HIGHER AND DEEPER THAN MOVABLE UNITS, IF DESIRED.

## FEATURES

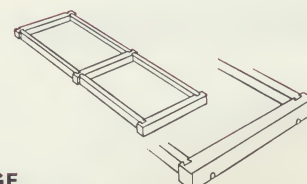

### STATIONARY END UNIT (1)

Consists of a standard unit of LUNDIA storage shelving, hardboard or birch panel backs with shelves that are adjustable on 2" centers.

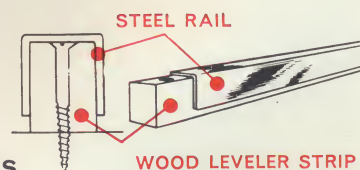

### MOVABLE SECTIONS (2)

Consist of standard units of LUNDIA storage shelving locked back-to-back, a hardboard back and shelves adjustable on 2" centers.

### CARRIAGE

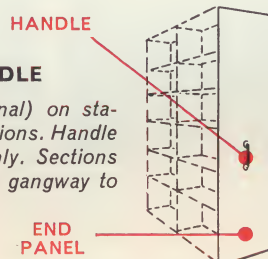

Standard LUNDIA storage shelving rides on hardwood carriages. Each carriage is fitted with precision steel roller bearings that ride steel rails mounted on floor.

### STEEL RAILS

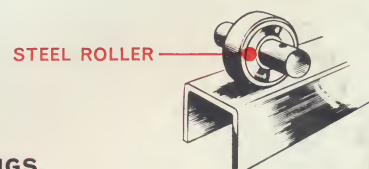

### WOOD LEVELER STRIP

Wood leveler strips are affixed to floor with flat head wood screws. Steel rail caps fit over leveler strips.

### END PANEL & HANDLE

Birch end panels (optional) on stationary and movable sections. Handle on movable sections only. Sections roll left or right to open gangway to shelving.

### BEARINGS

Precision sealed steel roller bearings are mounted on underside of carriage. Middle roller bearings have guide to provide directional stability when movable sections are in operation.

## OFFICE

*This installation, in the corner of a business office, is storing sales literature and supplies. Space saved is being used for a desk, chair and work area.*

## ARCHIVES

*Inactive records are now stored in 60 per cent less space than previously required when conventional shelving was used. All shelves may be adjusted, on 2" centers, without tools.*

## MERCHANDISE

*Soft goods, regardless of shape or size, are easily and economically stored in less space. Floor space saved here has been converted into a sales area and additional storage facilities.*

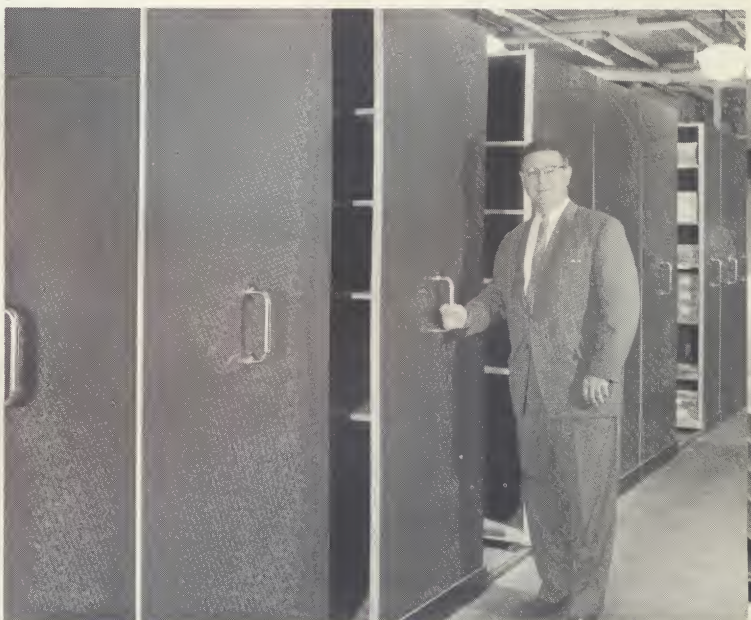

## GENERAL STORAGE

*This installation replaced conventional shelving and shows amount of new and not yet used shelving left after complete inventory was placed on FULLSPACE shelves.*

## RECORDS

*Business records are economically stored out of the way yet are readily accessible, at all times. Space gained is being used for reproduction equipment and additional storage.*

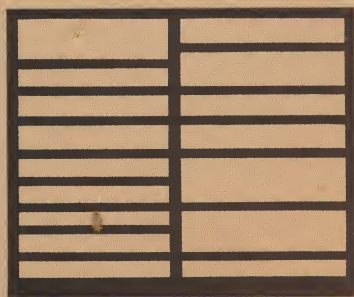

## SUPPLIES

*Business stationery, office forms and supplies are economically stored in less space for less cost. Units are easily rolled, left or right, or open single gangway to shelves.*

# Contemporary

Prefabricated and adjustable LUNDIA CONTEMPORARY wood shelving is perfect for offices, libraries, pharmacies, schools, retail outlets or in the home.

Easy to set up, rearrange or extend, LUNDIA CONTEMPORARY gives the appearance of permanence and custom design at a fraction of the cost.

Available in various combinations of depth, height and width, LUNDIA CONTEMPORARY wood shelving meets every requirement for serviceable, attractive and functional shelving.

All adjustable shelves may be removed or repositioned at 1" intervals, without tools and without disturbing other shelves.

LUNDIA CONTEMPORARY may be ordered in natural sanded woods, sealed and lacquered; stained, sealed and lacquered or painted and with plywood or matching hardboard backs, continuous or flush tops and kickboards.

LUNDIA CONTEMPORARY is delivered ready to assemble. No special tools or experience required. All hardware is furnished.

Write for descriptive literature. Free planning, layout and estimating services are available from the manufacturer on request.

# CUSTOM LOOK FOR LESS COST

## 1. PREFABRICATED

Ready to assemble. No cutting or fitting.

## 2. ADJUSTABLE

Shelves are quickly repositioned without tools.

## 3. EXPANDABLE

Add on units to any length.

## 4. ECONOMICAL

Looks like custom designed and built-in shelving but costs *much* less.

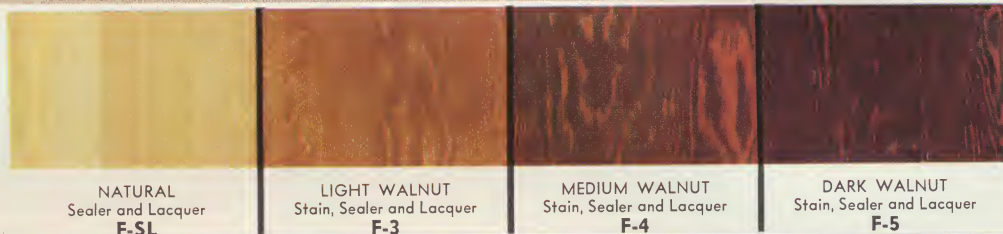

## 5. VERSATILE

Perfect in offices, stores or homes.

Here's LUNDIA CONTEMPORARY SHELVING... a basic unit and one add-on unit at bookcase height (36"). Assembly of this bookcase took less than 20 minutes.

LUNDIA CONTEMPORARY SHELVING may be ordered in natural sanded wood; sealed and lacquered; stained, sealed and lacquered or painted to match any decor.

# FEATURES

## UPRIGHTS

End uprights have holes drilled on one side only to accept wire shelf support guides. Intermediate uprights have holes drilled both sides.

## LOCKING STRAPS

Top, bottom and an intermediate shelf have steel straps which lock to companion straps affixed to uprights.

## KICKBOARDS

Slotted kickboards slide over wire guides at base of uprights.

## SHELVES

With exception of top, bottom and intermediate shelves, all shelves are adjustable on 1" centers. Shelves slide off wire guides. Guides are repositioned and shelves replaced.

SHELF  
SUPPORT  
WIRE

## SHELF SUPPORT WIRE

Steel shelf support wire is pressed into holes drilled in uprights. Wire guides are easily removed and repositioned on 1" centers.

## BACKS

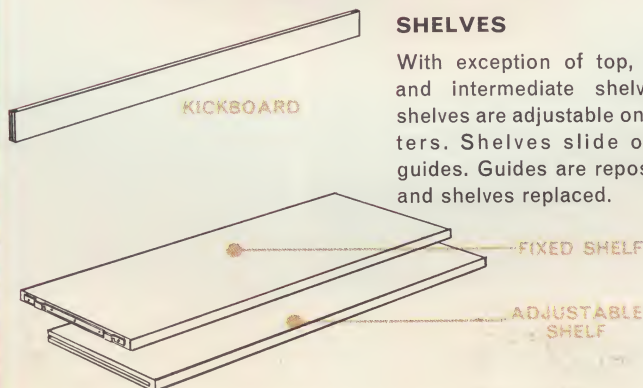

Matching  $\frac{3}{16}$ " fir plywood or hardboard backs snap into position between dadoed uprights and are permanently affixed with rosin coated nails furnished.

## TOPS

Matching flush or overhanging tops, as specified. Flush tops lock into position with steel straps. Overhanging tops lock to uprights with square shanked screws and furniture clips.

## FINISHES

LUNDIA CONTEMPORARY is available in natural, smooth finished wood or sealed and lacquered; stained, sealed and lacquered or painted. Special finishes, including gloss white for prescription departments, are available when specified.

## CLASSROOM

*This installation under a window, uses valuable floor space that would have been wasted. Bookcases shown are 36" high and 12" deep. Units are stained, sealed and lacquered.*

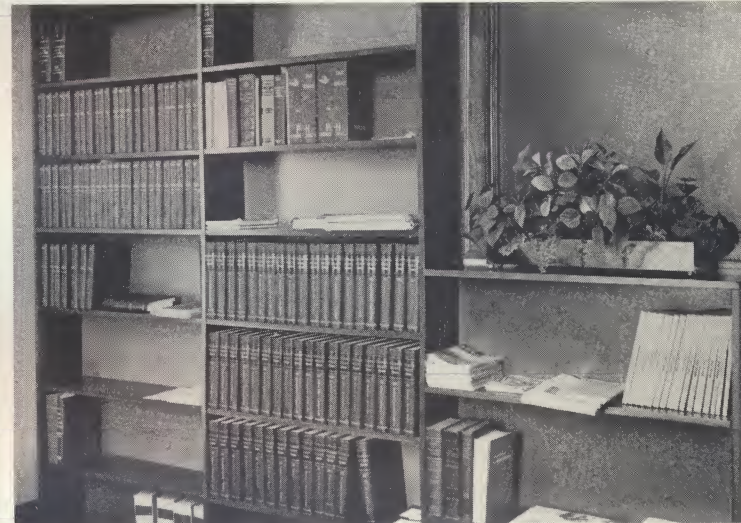

## ROOM LIBRARY

*Installed quickly and easily, this shelving serves as a library in an audio visual classroom. Note that deep shelves permit large books and reference materials to be stored flat.*

## SCIENCE LAB

*Equipment and supplies, regardless of size or shape, are easily stored. By removing and relocating shelf support wires, adjustable shelves are quickly repositioned on 1" centers. No tools needed.*

## LAW OFFICE

*Offering the dignified appearance of custom built and installed shelving, but at a fraction of the cost, two 84" high units have been combined with a unit 36" high that fits under window.*

## SHOE STORE

*This economical and attractive shelving adjusts on 1" centers to eliminate wasted space. Units are furnished in natural sanded woods or sealed and lacquered; stained, sealed and lacquered or painted to match your decor.*

## DRUG STORE

*Painted gloss white, this installation shows the versatility of this prefabricated shelving. In the prescription department, the shelving is reserved for pharmaceuticals and supplies while shelving in front displays self service merchandise.*
